

JUSTICE EMMANUEL

DATA ENGINEER | ETL/ELT · Cloud Platforms · Pipeline Architecture
emmanuelanalyst25@gmail.com · Abuja, Nigeria · [LinkedIn](#) · [Portfolio](#)

PROFESSIONAL SUMMARY

Results-driven Data Engineer with 4+ years of experience designing and optimizing scalable ETL/ELT pipelines, data lakes, and cloud-native data infrastructure across AWS and Azure environments (ADLS, ADF, Synapse Analytics, Databricks, Microsoft Fabric, S3, Glue, Lambda), including hands-on GCP-to-AWS migration work. Proven track record delivering measurable business outcomes including 40% improvement in data availability, 30% faster retrieval times, and ~20% reduction in cloud infrastructure costs. Proficient in Python, SQL, Apache Spark (PySpark), Apache Airflow, and dbt. Experienced collaborating with AI/ML teams on data preparation and model deployment readiness. Committed to data quality, governance, and DataOps best practices.

KEY ACHIEVEMENTS

40% increase in data availability Scalable pipelines ingesting telemetry, sensor & behavioral data

20% cloud cost reduction Strategic storage partitioning and resource optimization across enterprise cloud infrastructure

528% registration growth & 194% revenue uplift Power BI dashboards powered by reliable dbt data models

35% pipeline efficiency boost ETL workflow optimization across multi-source large datasets

PROFESSIONAL EXPERIENCE

Data Engineer | AVZDAX Technologies Abuja, Nigeria

Dec 2025 – Present

- Engineered scalable ETL/ELT pipelines ingesting telemetry, sensor, and behavioral data using Apache Airflow and Python, improving data availability for analytics and AI/ML teams by 40%.
- Architected and deployed a centralized data lake on Azure Data Lake Storage (ADLS Gen2), utilizing Azure Data Factory (ADF) for orchestration, streamlining data retrieval and reducing latency by 30%.
- Built and managed enterprise data pipelines using Azure Data Factory (ADF) and ADLS, integrating Azure Synapse Analytics and Azure Databricks for large-scale transformation and analytics workloads.
- Leveraged Microsoft Fabric to unify data engineering and analytics workflows, enabling streamlined collaboration between data and BI teams across the Azure ecosystem.
- Implemented Medallion Architecture (Bronze/Silver/Gold layers) with standardized schemas, improving data consistency and reducing downstream errors across pipelines.
- Built data quality frameworks using Great Expectations, reducing data inconsistencies and missing records across critical datasets.
- Optimized cloud storage partitioning, hierarchical namespaces (HNS), and file processing configurations within ADLS, achieving approximately 20% reduction in infrastructure costs.
- Collaborated with AI/ML teams on dataset preparation, feature engineering, and pipeline readiness to accelerate model training and deployment cycles.
- Developed ETL workflows for large-scale datasets using PySpark, boosting pipeline throughput by 35%.

Data Engineer & Analyst | PQP Marketing Consult Abuja, Nigeria

Aug 2023 – Nov 2025

- Designed and executed an enterprise data migration strategy, transferring legacy data assets from GCP (GCS, BigQuery) into an AWS-native data lake (S3) with zero downtime.
- Built and automated serverless ELT pipelines using AWS Lambda for data ingestion and AWS Glue for schema cataloging and ETL jobs, with Apache Airflow orchestrating complex dependency workflows.
- Built ELT workflows transforming 9+ raw source tables into analytics-ready schemas, improving query performance and reducing report generation time.
- Implemented data governance and access control frameworks using AWS IAM policies and S3 bucket ACLs, ensuring secure, role-based data access for cross-functional analytics teams.

- Implemented data quality validation checks (schema validation, null checks, deduplication), ensuring integrity and consistency across datasets.
- Developed Power BI dashboards backed by reliable dbt data models, contributing to 528% growth in registrations and 194% revenue increase.
- Collaborated with marketing stakeholders to translate business requirements into scalable, reusable data models and pipeline architecture.

Data Analyst | The DebaterVerse Remote

Dec 2022 – Apr 2024

- Conducted data research and survey analysis to identify participation barriers; insights drove a targeted advertising strategy resulting in 70% increase in tournament participation.
- Built predictive revenue forecasting and KPI tracking models achieving forecast accuracy within a 1.4% margin.
- Implemented resource management analytics, optimizing spending and logistics for sustainable tournament operations.

Data Analyst Intern | Heritage Communications Owerri, Nigeria

Jun 2021 – Jan 2022

- Reduced customer churn by 70% using predictive modeling to identify at-risk customers and trigger targeted retention strategies.
- Conducted vertical and horizontal data analysis to optimize resource allocation, leading to 80% reduction in operational losses.
- Transformed complex datasets into actionable dashboards, enabling data-driven decision-making for non-technical stakeholders.

TECHNICAL SKILLS

Languages	Python (Pandas, NumPy, PySpark), SQL, Bash
Pipeline & ETL	Apache Airflow, dbt, Apache Spark (PySpark), Great Expectations, ETL/ELT
Cloud AWS	S3, Glue, Lambda, EC2, Redshift, AWS Data Pipeline
Cloud GCP	GCS, BigQuery (data migration & legacy systems)
Cloud Azure	Azure Data Lake Storage (ADLS), Azure Data Factory (ADF), Synapse Analytics, Azure Databricks, Microsoft Fabric
Data Warehouse	Snowflake, Google BigQuery, Amazon Redshift
Databases	PostgreSQL, MongoDB, MySQL
Orchestration	Apache Airflow, dbt, event-driven workflows
BI & Viz	Power BI, Looker Studio
Practices	DataOps, Data Governance, Data Modeling, Data Quality, CI/CD, Agile
Containers	Docker (familiar), Git/GitHub
Domains	MarTech, FinTech, NGO/Development, Energy, HR Analytics

EDUCATION & CERTIFICATIONS

Bachelor of Arts History & International Studies
 Imo State University, Owerri, Nigeria | 2017–2022

 Certifications: Diploma in Data Analytics & Business Intelligence (IQAF) · Introduction to Data & Data Science (365 Data Science) · SQL Complete Bootcamp Basic to Advanced (Udemy) · Data Visualization: Empowering Business with Effective Insights (Forage) · Essential Business Analytics (Programming Hub)

LANGUAGES & SOFT SKILLS

Languages: English (Full Professional Proficiency) · French (Intermediate)
Soft Skills: Stakeholder Management · Root Cause Analysis · Technical Documentation (SOPs/Architecture) · Cross-functional Collaboration · Agile Project Management
